

SPARTAN data processing script updates

Haihui Zhu (haihuizhu@wustl.edu)

Atmospheric
Composition
Analysis
Group

Important updates for users:

- More robust data processing
 - Updated reconstructed fine mass (RCFM) calculation
- More completed data
 - Added measured/estimated HIPS BC
- Better data quality
 - Added filter condition flag
 - Removed filters in bad condition

In progress:

- Adding detection limit of IC, HIPS, and chamber
- Sharing SPARTAN data with OpenAQ
